

A UNION OF EXPERIENCE AND SOLUTIONS

Scallon Controls and EPI Join Forces.

Beaumont, TX, August 1, 2017– Scallon Controls is pleased to announce the merger of EPI (Energy Power, Incorporated) with Scallon Controls. EPI has been a trusted source for pressure and safety relief valves, automated and manual valves, rotating equipment and instrumentation for over 40 years in the Southeast Texas Region. EPI is a National Board of Boilers and Pressure Vessel Inspection certified center with NB, VR and UV stamps of approval. These provide verified capability for repair and in-service testing of all brands of pressure and safety relief valves including Anderson Greenwood and Crosby products now manufactured by Emerson.

Today's integration of Scallon and EPI will simplify sourcing and servicing of valves and instrumentation from many different providers, which will lower complexity and cost. Scallon Controls President Joe Herink expressed his excitement at the expansion of capabilities this merger brings to the region.

“Scallon Controls has been growing and expanding for our entire 40-year history. This merger brings many quality people and capabilities into one organization which will allow us to provide a more complete suite of products and services to our customers. Our customer solutions focus drives Scallon to provide the best service and most effective products in the area.”

Scallon Controls' relationship with Emerson as a Local Business Partner balances local expertise with global leadership. Emerson is a world class manufacturer of leading and innovative technical solutions and is the manufacturer of a wide variety of automation products. Scallon Controls offers the local, human-powered network of application expertise and resources. Working across North America with fellow Local Business Partners, or around the globe with Emerson, Scallon Controls strives to collaborate with you to solve your toughest challenges. EMERSON – One Global Manufacturer, Supplying and servicing all valves, everywhere.

About Scallon Controls

Scallon Controls is an Emerson Local Business Partner that brings process industry customers best-in-class technologies, process insights, and leading services that deliver reliable, safe, and efficient operations. This is now extended to include EPI as the local premier source for Pressure and Safety Relief valves manufactured by Emerson companies. Scallon, Emerson, EPI, and the North American Local Business Partner community have the expertise to solve your toughest automation and control challenges.
